Reading and Math Intervention for Elementary and Middle Grades

Pathblazer® by Compass Learning®:

Purpose-built to bring students up to grade-level proficiency

Solid literacy skills and core math concepts are key first steps toward academic success. Pathblazer learning acceleration software gives teachers the tools they need to move struggling Kindergarten through 8th grade learners up to grade-level proficiency in math or ELA/reading. Pathblazer builds confidence by starting students at their highest proficiency level and guiding their acceleration forward. The software prescribes an individualized learning path with fun, motivating content while filling in skill and concept gaps. Plus, our curriculum is Common Core and state standards-aligned, so you'll know that your students aren't just catching up—they're hitting the mark.

Now includes K-2 content!

FEATURES

- Adaptive screener to determine each student's highest functional performance level
- Automatically assigned diagnostic assessments to pinpoint skill and concept gaps
- Automatically generated individualized learning plans
- Accommodates students working from two levels **below** to one year **beyond** grade level

Instructional design for both Math & Reading/ELA Intervention*

ELEMENTARY
Grades K—6

Supported Practice

MIDDLE SCHOOL
Grades 6—8

Assessments

Explicit Instruction

Independent Practice

*Accommodates students working as much as two levels **below** grade level, and can accelerate students **beyond** grade level

- **Annual Site Subscription Licenses (SSL)** provide an annual license and access to the content for all students and teachers at a particular site. SSL accounts are hosted by Compass Learning. Hosting, support, and version updates and upgrades are included in the annual SSL fee.

- **Annual Single User Subscription Licenses (SUS)** provide an annual license and access to the content for a quantified number of student users. Hosting, support, and version updates and upgrades are included in the annual SUS fee.

- **Unlimited User Liscenses (UUL)** provide a perpetual ownership license and unlimited access to the content for all students and teachers at a particular site. UUL accounts can be hosted on district servers or hosted by Compass Learning. A small annual support fee provides hosting, access to helpline and all product support resources, and any version updates and upgrades released during the active support period.

- Fast Start implementation training is ***included with SELECT*** software purchases.
