Sanger Unified has garnered national recognition for its work in educating all students and being one of the few districts in the State of California that was able to exit Program Improvement status. Part of Sanger's success has been its focus on increasing student attendance including identified sub groups. If students are not in their seats..... they cannot learn or benefit from any services the school or district has to offer. Sanger Unified has established a comprehensive approach to supporting student attendance. These services will be presented from a school perspective up to the district level Model SARB process.

He will focus on what districts need to do to support foster and homeless students and will cover all of the current legislative changes that will take affect in the 2018-2019 school year.

School Attendance Review Team (SART) meetings provide our most important opportunity to reduce chronic absenteeism. Effective strategies for maximizing our potential impact at this early stage can make the critical difference between improving attendance, or pushing parents and students into later stages of the SARB process. This workshop will include an analysis of the impact of absenteeism and will highlight some outstanding practices for SART meetings.
